

WHY CHOOSE RISK MANAGER?

- Do you have a **goal to achieve zero harm**?
- **Worried about compliance** with the Health and Safety in Employment Act?
- Spending **too much time chasing people** to do their actions?
- Is **collating information** from various sites or people consuming too much of your time?
- Do you have **problems with data consistency or quality** of information?
- Need a **central place** for the recording, storing and reporting of all information?
- Want to introduce processes that are based upon recommended **best practice**?
- Need to provide your senior management team or Board with **assurance** that risks are being effectively managed?

IF YES TO ANY OF THE ABOVE, HAVE A LOOK AT IMPAC'S RISK MANAGER TOOL AND FIND OUT WHY MANY OF NEW ZEALAND'S LEADING COMPANIES ARE TURNING TO RISK MANAGER.

WHY IMPAC?

Impac has been providing Health, Safety and Risk consulting and training packages to companies all over New Zealand since 1999, including major multinational corporations.

We offer affordable solutions for risk and safety management, combining our skills with the Risk Manager web-based software tool. No competitor can offer the same level of system functionality, integration or national service coverage.

Risk & Safety Management Solutions

OVERVIEW OF RISK MANAGER

Risk Manager is an integrated web based software system that provides a vehicle for organisations to manage their business risks, safety and compliance requirements.

Risk Manager has a number of management modules including:

- Incidents,
- Hazards,
- Risks,
- Audits,
- Contractors,
- Environmental obligations, and
- Training.

Each module can be configured to meet your specific requirements. At the centre of the tool is the actions module, which ensures all compliance actions are recorded, communicated, tracked and included in management reports.

Sophisticated management reports and graphical analysis can be extracted into excel, word and PDF format using the latest Microsoft SQL Server Reporting tools. This allows custom reports to be easily built by your company system administrator and saved for user access.

RISK MANAGER PROVIDES

- **A customised solution** that allows you to build your desired organisational and physical structures and internal processes into a functional tool. Configuration includes fields, screens, email notification
- **A user friendly tool**, based on Microsoft tools (SQL 2008 database, ASP and .NET, reporting services and analysis services), allowing our system to be used by anyone with a web connection and web browser, with reports exported to Excel, Word or PDF.
- **A tool that exceeds the compliance requirements** of the Health and Safety in Employment Act (1992) and conformance with the ACC Partnership or WSMP Programme, saving you money on your premium.
- **Processes** that are based upon recommended best practice.
- **Saves management time** through the automation of key tasks and production of reports.
- **Improves business efficiency** and reduces losses by assisting staff with the management of compliance related actions.
- **Eliminates headaches**, overheads and lengthy implementation cycles associated with developing and implementing your own risk or safety management software.
- **Constantly enhanced**—Your version is always the latest version, with regular enhancements being applied to the application.
